

SmartHire — Applicant Screening System

Workflow overview + Bug report | Generated 2026-08-07

1. Workflow (Simple ah)

- 1

Candidate apply pannradhu
Rendu vazhi: (a) Public link (`/apply/:id`) via outside candidates resume upload pannuvaanga, (b) Admin bulk upload (`/upload`) via HR team resumes upload pannuvaanga.
- 2

Resume processing
PDF-la irundhu text extract pannuraanga (pdfjs library). Andha text-a Groq AI (llama-3.3-70b model)-ku anupi, AI score + recommendation + strengths + missing skills return pannum.
- 3

Storage
Resume file Supabase Storage-la save aagum. Candidate details + AI score `applicants` table-la insert aagum.
- 4

Recruiter review
HR team CandidateList / AIResults page-la score adhaara sort panni paakalam. Shortlist / Reject / Interview schedule pannalam. Interview schedule pannina, WhatsApp-ku automatic resume anuppa automation irukku (Python script use panni).
- 5

Result
Candidate status "Pending / Shortlisted / Rejected" nu update aagi, dashboard-la results theriyum.

Concept level-la idhu simple dhaan — aana implementation-la niraya inconsistency and half-finished logic irukku. Keezha detail ah paarunga.

2. Bugs & Issues — Overall List

Security — Critical / High

Severity	Issue	Details
CRITICAL	API keys / secrets committed to repo	Root <code>.env</code> and <code>server/.env</code> -la real Supabase key, GoHighLevel (GHL) private token, Groq & Anthropic API keys plaintext-la irukku — repo access irundha yaaraachum paakalam.
CRITICAL	GHL private token browser-ku expose aagudhu	<code>VITE_GHL_TOKEN</code> — <code>VITE_</code> prefix irukkardhala idhu client-side JS bundle-la vandhidum. Edhavadhu website visitor devtools/network tab-la paartha andha private token kidaikkum (<code>InterviewSchedule.jsx</code>).
CRITICAL	Backend APIs-ku authentication e illa	<code>/api/ai/screen</code> , <code>/api/share-whatsapp</code> routes evanaachum call panniralaam. Free-ah AI quota use pannalam, WhatsApp automation trigger pannalam — login/session check onnume kidaiyathu.

HIGH	SSRF risk (/api/share-whatsapp)	Request body-la vara URL-a validate pannaama server nera download pannidum — arbitrary URL kudutha server disk-ku edhavadhu download aaga vaikkalam.
HIGH	Rendu vera Supabase client, oru hardcoded key	src/supabaseClient.js -la URL/key source-la nera hardcoded pannirukkanga (env-based src/supabase.js -oda vera). Key rotate pannina, Navbar.jsx / Settings.jsx mattum old project-oda thaana pesum — confusing partial-outage bug varum.
MEDIUM	Server-side authorization illa	Access control ellame browser-side ProtectedRoute.jsx mattum. schema.sql empty — Row Level Security policies repo-la illa. RLS seri ah configure pannalana, admin data evanaachum nera Supabase client vecha padikkalam.

Functional Bugs — Feature Broken

Severity	Issue	Details
CRITICAL	Interview SMS — hardcoded contact ID	InterviewSchedule.jsx -la real GHSL contact creation code comment aagi, pathila fixed contact ID ("gHnYSdEIaXvZBYPy1mq") use pannuraanga. Result: yaaru interview schedule pannalum, SMS ella times-um same oru person-kku dhaan pogum — real candidate-ku pogadhu.
HIGH	Public apply form — job ID use pannalaye	/apply/:id URL-la job id edukkuraanga, aana andha id insert query-la use pannalaye. So andha candidate edhu job-ku apply pannaraanga nu system-ku theriyathu, JobDetails.jsx per-job list-la varave varadhu.
HIGH	AI score fake ah hardcoded pannirukkanga	Public apply path-la real AI score use pannama ai_score: 85 nu fixed value ella candidates-kkume kudukkuraanga. Score-based sorting/filtering intha path-ku meaningless aayidum.
MEDIUM	.doc / .docx resume text extraction seri illa	Binary/XML format file-a plain text ah padikka try pannuraanga (file.text()) — garbage data AI-ku pogum. Server-side mammoth library seri ah irundhalum, andha function edhume call pannaama irukku (dead code).

Code Quality / Maintenance

Severity	Issue	Details
LOW	Empty / unused files niraya irukku	adminService.js , csvService.js , useAdminManagement.js , useCSVData.js , constants.js , server/routes/adminRoutes.js , server/routes/csvRoutes.js — ellame completely empty, use pannama vechirukkanga.
MEDIUM	Error handling weak	Palaru places-la Supabase call fail aana console.log mattum pannuraanga — user-ku edhume theriyathu, silent-ah empty list/zero count varum.
LOW	Disk space leak	automation/temp/ folder-la WhatsApp share pannradhukku download panna resume PDFs delete pannama accumulate aagikittu irukku (already dozens of stale files).

LOW	Documentation illa	schema.sql empty (database structure documented illa), README.md default Vite template — project-pathi edhume illa, .env.example kooda illa.
-----	--------------------	--

Chumma sollanumna: App idea/flow simple dhaan, aana security-um core logic-um half-baked ah irukku. Mukkiyama **hardcoded WhatsApp/GHL contact ID** bug romba serious — ella interview SMS-um wrong person-ku pogum. Adhukku appuram **committed secrets** and **missing job-id link on public apply form** next priority.
